Malang, Indonesia 65141

Informatics Engineering undergraduate and Software Engineer with a strong focus on Full Stack Web Development and AI Integration. Experienced in building scalable applications and intuitive user interfaces using Next.js, React, Laravel, and native web technologies. Adept at seamlessly integrating Large Language Models via Groq API and Hugging Face to create intelligent automated workflows. Passionate about bridging the gap between robust software architecture, engaging design, and innovative AI solutions to deliver modern user experiences.

Education

Sarjana Ilmu Komputer | Teknik Informatika

August 2023 – Present

Universitas Brawijaya – Malang City, Indonesia

- Organization: Raion Community 2024/2025 – 2025/2026.
- GPA: 3.80/4.00

Jurusan Matematika dan Ilmu Pengetahuan Alam

June 2020 – April 2023

SMA Brawijaya Smart School – Malang City, Indonesia

- Included in the “Top 20” eligible students for the National University Entrance Selection (SNBP).
- Organization: Science Olympiad.
- Average report score: 86/100.

Experiences

Software Engineer Intern

June 2026 – Present

PT Sukma Anugerah Seroja

- Contributed to the development of Bang Reno, an artificial intelligence application built to streamline construction planning by automating cost estimations, working drawings, and 3D model generation.
- Designed and implemented new user interfaces using native web technologies such as HTML, CSS, and JavaScript, translating complex architectural workflows into intuitive and responsive layouts.
- Integrated core application features within a WordPress environment, utilizing native PHP and JavaScript to handle data fetching and dynamic content rendering for seamless server side communication.
- Delivered a functional and user friendly experience that empowers individuals to efficiently simulate construction documents and reduce renovation decision making time.

Back End Developer Mentee

January 2026 – Present

Maxy Academy

- Engineered RESTful APIs and robust backend systems using Laravel and modern development practices to build scalable, high-performance web applications.
- Integrated LLM technologies and AI-driven workflows utilizing Hugging Face, n8n automation, and Telegram bots to support intelligent feature development.
- Delivered full-stack hackathon projects, including an AI-powered itinerary planner with real-time chatbot integration and a seamless transaction web platform.
- Implemented secure authentication architectures, including Google OAuth and Two-Factor Authentication (2FA), while applying SEO strategies to optimize platform discoverability.

Vice Chief of Infrastructure Technology

January 2026 – Present

Raion Community, Fakultas Ilmu Komputer, Universitas Brawijaya

- Directed a 30+ member infrastructure team across five technical sub-divisions (Website, Itch.io, Behance, Discord, and Development Tools), strengthening the community's digital presence.
- Managed the development and maintenance of digital platforms, overseeing technical execution, standardizing collaboration tools, and coordinating cross-division workflows.
- Optimized team operations and onboarding workflows by setting technical priorities, assigning tasks, and ensuring consistent delivery of high-quality outputs within project timelines.

Mobile Application Developer

March 2025 – Present

Raion Community, Fakultas Ilmu Komputer, Universitas Brawijaya

- Developed native Android applications using Kotlin and Jetpack Compose, focusing on declarative UI approaches to build modern, user-friendly, and scalable mobile platforms.
- Applied industry best practices in Android development, including clean architecture, state management, and responsive UI design to ensure maintainable, high-quality code.
- Contributed to the core development of 'Serenia', a mental well-being application, prioritizing intuitive user experiences and reliable application performance during an internship program.

Staff Innovation of Technology

Feb 2025 – Dec 2025

Raion Community, Fakultas Ilmu Komputer, Universitas Brawijaya

- Co-led game management initiatives, curating and maintaining the official Raion Community Itch.io distribution page to showcase members' projects.
- Spearheaded campus-wide promotional campaigns at FILKOM Universitas Brawijaya, significantly enhancing the exposure of members' indie games within the local gaming community.

Laboratory Teaching Assistant – Data Structures & Algorithms

Sept 2025 – Dec 2025

Fakultas Ilmu Komputer, Universitas Brawijaya

- Facilitated practical laboratory sessions for approximately 32 undergraduate students, guiding them through fundamental concepts of data structures and algorithmic problem-solving.
- Supported the end-to-end academic process, including the preparation, execution, and comprehensive evaluation of weekly practical programming assignments.

Game Artist

Apr 2024 – Jan 2025

Raion Community, Fakultas Ilmu Komputer, Universitas Brawijaya

- Designed immersive game visual assets, including unique character designs and environments tailored to enhance storytelling and player engagement.
- Developed fluid and stylized character animations, ensuring smooth and responsive interactions that elevated the overall dynamic gameplay experience.

Projects

Raion Community Website

January 2026 – Present

Raion Community, Fakultas Ilmu Komputer, Universitas Brawijaya

- Led the infrastructure technology team as Vice Chief, overseeing sprint planning, execution, and team performance to ensure development targets were consistently met.
- Conducted regular sprint reviews and Quality Assurance (QA) to ensure the final product strictly aligned with design requirements and product specifications.
- Managed the development of a comprehensive company profile platform, featuring event tracking, member project showcases, and a streamlined automated registration form system.

TapRoute

Mar 2026

Maxy Academy

- Designed and developed a modern, user-centric web interface for an AI-powered travel planning platform using Next.js.
- Engineered the system workflow and integrated the Groq API for high-speed LLM inference, enabling real-time AI chatbot capabilities to assist users with instant itinerary management.
- Integrated a secure payment gateway into the front-end architecture, delivering a seamless, end-to-end intelligent user experience.

RumahAman

Oct 2025 – Nov 2025

Fakultas Ilmu Komputer, Universitas Brawijaya

- Developed a violence support and reporting mobile application using Jetpack Compose, focusing on creating a safe, responsive, and accessible user interface.
- Integrated AI services via the Groq API to power a personalized virtual consultant chatbot, providing immediate and intelligent guidance for users.
- Architected the system design and implemented Firebase (Authentication and Firestore) to ensure secure user data management and real-time backend synchronization.

Raion Community, Fakultas Ilmu Komputer, Universitas Brawijaya

- Developed a web-based contract lifecycle management platform within a strict 24-hour timeframe, collaborating cross-functionally in a 3-person team (UI/UX, Frontend, AI).
- Spearheaded the front-end development and integrated machine learning models from a FastAPI backend directly into the user interface.
- Implemented AI-driven features designed to evaluate contract feasibility, optimize efficiency, and mitigate enterprise risks during the legal procurement process.

Skillset

Skills: LLM Integration, Prompt Engineering, Groq API | JavaScript, TypeScript, Kotlin, Dart, PHP, Python, HTML, CSS | Flutter, Jetpack Compose, React, Next.js, Laravel, WordPress | REST APIs, Node.js, Firebase, Supabase, PostgreSQL | Git, Postman, Vercel | Clean Architecture, MVC

Soft Skills: Collaboration, Communication, Responsibility, Adaptability, Problem Solving

Languages: English (Upper-Intermediate), Bahasa Indonesia (Native)

Achievements

- 3rd Place – Technoday Hackathon UNNES 2025.
- Finalist – Top 15 of 42 participants in IFest UNPAD Hackathon 2025.
- Finalist – Top 5 IT FEST UMK Web Development Competition.
